ASB Composite

Wear-free anti-skid solutions to prevent falling and slipping

Skid and fall: it seems trivial but it still is the second largest cause of accidents in work places and public areas. The consequences reach from freight and embarrassment to serious injuries. ASB Composite strongly reduces skidding hazards in all possible risk situations near staircases, ladders, platforms, aisles, loading docks, passages, working platforms, access slipways, industrial flooring, etc. ASB Composite are high-technological multi-layer sheets made of strong plastic with lined non-skid particles that do not loosen when being driven on and that also remain their safe and reliable function when wet. ASB Composite is a durable, high-impact and maintenance-free sheet that excludes any kind of skidding.

DISCOVER THE UNIQUE ADVANTAGES OF ASB Composite

Fixed lined non-skid particles · durable multilayer construction · minimal down time

PRODUCTS

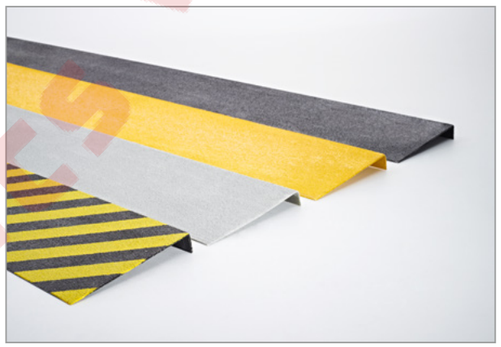

Discover our large product range

ASB Composite is available in various versions which makes the paths suitable for almost all possible applications. ASB Composite is available in standard plates, low-profile plates and in versions for staircase or ladder steps. Moreover, all custom-made work is possible (size, thickness, composition and color). All ASB Composite parts are supplied in the size you want, fully ready for use.

ASB Composite PLATES

Plates are designed for all plain floors. They are available in 3 standard colors (yellow, gray and black) (or on demand in any other RAL color) and in 3 particle sizes (S, M or L) and are supplied to the required size or on manufacturing length.

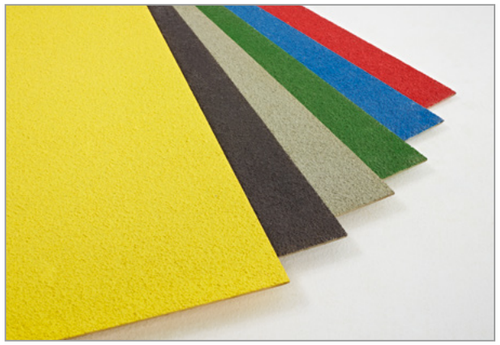

ASB Composite STAIR TREADS

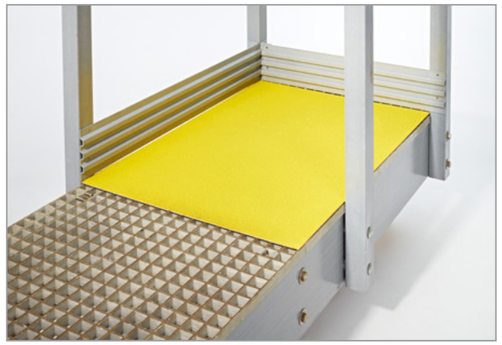

The ASB Composite stair treads are designed for all plain staircases and steps. They are available in 3 standard colors (yellow, gray and black) (or on demand in any other RAL colour) and in 3 particle sizes (S, M or L) and are supplied to the required size or on manufacturing length.

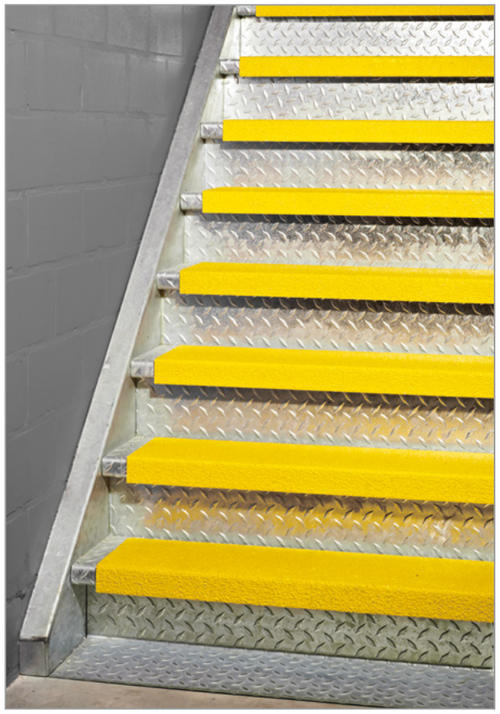

ASB Composite PROFILES

The ASB Composite profiles are designed for all plain industrial and public applications and/or areas. They are available in 1 standard color (yellow) (or on demand in any other ral color) and are supplied to the required size or length.
